

Preparing your Domain to transfer from Namecheap

Getting Started

Before you can transfer a domain:

- **Disable** domain/whois privacy. If the privacy service forwards incoming email, check the 'forward to' contact email address for accuracy.
- **Confirm** your administration email address in the domain registry records.
- **Verify** that the domain is unlocked.
- **Obtain** the domain's transfer authorization code (also referred to as an EPP or auth code).

Note: Registrar rules vary. Your domain may not be transferable within 60 to 120 days of registration, a previous transfer, or renewal.

Your account

- Go to: namecheap.com
- You will need your account username and password.
- If you do not have your account details, you will need to contact Namecheap. You can contact support by opening a ticket or via live chat.

Step 1: Go to namecheap.com and login to your account.

The screenshot shows the Namecheap website homepage. The browser window title is "Namecheap.com - Cheap domain name registration, renewal and transfers - Free SSL Certificates - - Microsoft Inter...". The address bar shows "http://www.namecheap.com/". The website header includes the Namecheap logo, a navigation menu with links like "Home", "Register a Domain", "Transfer Your Domain", "Privacy Protection", "FreeDNS", "Web Hosting", "SSL Certificates", "Marketplace", and "My Account". A main banner offers domain registration for \$9.69. Below this, there are sections for "Affiliate Earn Great Commissions", "Services Included With Every Domain" (listing features like free URL forwarding and SSL certificates), "Transfer Domains to Namecheap" (highlighting a price of 969 USD), "Our Products" (featuring RapidSSL certificates for \$10.95), and a "Login to your account" section with fields for username and password.
